American Earth Anchors

Installation

3" Arrowhead or Bullet
with cable clamps or anti-theft loop

Drive rod fits into back of anchor

Cable clamps
Correct method

Working end (to anchor)

Dead end

Install clamps like this for maximum holding

The U-bolt goes over the DEAD end of the cable

Cable Clamps

Drive anchor into the ground
Remove drive rod
Pull cable to turn and "lock" the anchor
Make loop with cable clamps

During locking, anchor will move up as it turns, settles, and locks. Depending on soil type, this can be 1-3 inches.

Anti-theft Loop

FIRST: Wrap cable around structure and pass anchor through loop

Drive anchor into the ground
Remove drive rod
Pull cable to turn and "lock" the anchor

DRIVING METHODS

Sledge hammer
Demolition hammer
